

An abstract geometric pattern featuring concentric, slightly irregular diamond shapes. The colors used are a vibrant red, a metallic gold, a deep black, and a clean white. The pattern is layered, with the red and gold forming the outer rings, and the black and white forming the inner rings. The overall effect is a sense of depth and movement. The pattern is set against a background of light-colored wood paneling.

### Everyday care

---

To further extend the lifetime of the rugs, we recommend a regular maintenance in order to retain its shape and appearance. Light color rugs will require more care than darker color or patterned ones. Thorough vacuuming is the best, and an environmentally friendly method of cleaning. It is most efficient to vacuum the rug one direction at a time.

### Cleaning

---

Professional cleaning of rugs is recommended. All rugs should be washed flat using water and then dried flat. It is very important to provide a good ventilation during the drying process

### Choosing a rug

---

Choose the characteristics of the rug, its color and design to suit the space in which it will be laid. If it is to be laid in a hall, for example, you may choose a type of rug that is more resistant to wear, and a color that is a little darker and dirt tolerant.

Our rugs are suitable for most settings, both public and private.
